# HEALTH & HUMAN SERVICES

## Services and Technologies

CMA divides our solutions into two main groups: services and technologies that support those services. Services include systems integration, professional services, case management platforms, and product resale.

CMA specializes in providing IT consultants with demonstrable industry experience to augment your organizational capacity on a temporary basis. For more than 35 years, we have placed professionals with the nuanced technical/domain expertise required by clients within the Public Sector, as well as the Finance, Banking, Manufacturing, Scientific Research and Engineering industries.

Our rigorous recruiting and qualification processes position CMA to present highly skilled candidates in a timely and nimble manner. Proven and effective, we are proud to have satisfied the professional services needs of countless customers and their dynamic technical/business imperatives, including:

- Applications development
- Database design
- QA / Testing
- Data management
- Advanced analytics
- Systems integration
- Network management
- Enterprise Security
- Systems administration
- Training
- Project management

CMA holds multiple government contract vehicles, spanning from national to city levels, including GSA, which provides long-term access to our solutions for the entire country, as well as more focused contracts available in New York, Ohio, Texas, Massachusetts, Arizona, and more.
